## SUMMARY

I am a practicing multi-disciplinary artist with a main focus on music. 7 years of experience composing & producing, 5 years of experience programming, 2 years of experience drawing, and 1 year of experience animating (mostly rig-based, some traditional experience).

I love working on teams and getting an opportunity to collaborate! Learning from others and trying my best to gain new perspectives really completes my life and gives me drive to continue putting my all into creative work. The perfect placement is a music production job in this kind of setting!

## EXPERIENCE

**Wolseley, Saskatchewan Town Office (Web Development)**

Feb. 2024 - Jun. 2024

Back & Front End Web Developer for <https://wolseley.ca>.

## EDUCATION

**University of Lethbridge, Bachelor of Fine Arts (Digital Audio Arts Major)**

1st Year Student

**Wolseley High School**

Class of 2024

## SKILLS

### MUSIC

I have released 2 albums and 1 single, making music for miscellaneous projects as well as personal enjoyment. Recent research of mine has included

more experimental and obscure genres including Noise, Avant-Garde, and general experimental genres & styles.

#### **PROGRAMMING**

Creating smaller scale game projects is a great pastime of mine, building systems up from scratch and understanding how apps or games work on a low level brings me a much greater appreciation of what we have. Programming skill also aids in my problem solving & critical thinking ability.

---

#### **DRAWING**

After years of wanting to be well-rounded in all aspects of art, drawing was always the most difficult part to grasp. In the past few years I have been focusing on improving my ability and style of drawing with great results and enjoyment gained. I also have a specific interest in designing logos.

---

#### **ANIMATION**

Working on game projects as a pastime works well when I can work on every aspect of development by myself, and animating character sprites or background elements is a nice skill to have, and as with everything else, I have enjoyed doing it a lot. The skill also lends well into storyboarding or concepting ideas, like animated music videos, or making small assets for design work like websites or videos.

---

#### **PROJECT DEVELOPMENT**

My project passion gives me the opportunity to work on teams with other artists, which has helped my leadership skills & improved my problem solving abilities. Working well with a team is my top priority, as it creates the best environment for a higher quality of work & enjoyment.
